RESPONSE TO RESTRICTION REQUIREMENT

Sir:

Applicant respectfully traverses the restriction requirement set forth in the Office Action dated October 11, 2005.

The Office Action sets forth a restriction requirement between two groups of claims: Group I, claims 18-28, is drawn to an exposure method of exposing a substrate to a pattern, and is classified in class 438, subclass 16; and Group II, claims 29-33, is drawn to an exposure apparatus for exposing a substrate to a pattern, and is classified in class 250, subclass 499.22.

The Examiner asserts that the inventions of Groups I and II are related as process and apparatus for its practice, and have acquired a separate status in the art as shown by their different classification such that separate examination is required. These contentions are respectfully traversed.

Applicant submits that the inventions of Groups I and II are closely related in the field of exposing a substrate to a pattern that a proper search of any of the claims would, of necessity, require a search of the others. Thus, it is submitted that all of the claims can be searched simultaneously, and that a duplicative search, with possibly inconsistent results, may occur if the restriction requirement is maintained.

Applicant further submits that any nominal burden placed upon the Examiner to search an additional subclass or two, necessary to determine the art relevant to Applicant's overall invention, is significantly outweighed by the public interest in not having to obtain and study several separate patents in order to have available all of the issued patent claims covering Applicant's invention. The alternative is to proceed with the filing of another application, consisting of the same disclosure, and being subjected to substantially the same search, perhaps by a different Examiner on a different occasion. This places an unnecessary burden on both the Patent and Trademark Office and on Applicant.

In the interest of economy, for the Office, for the public-at-large and for Applicant, reconsideration and withdrawal of the restriction requirement are respectfully requested.

Nevertheless, in order to comply with the requirements of 37 CFR 1.143, Applicant provisionally elects, with traverse, to prosecute the invention of Group I, namely claims 18-28.

Favorable consideration and an early passage to issue are also requested.

Applicant's undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should be directed to our address listed below.

Respectfully submitted,
